EDUCATION

City College of New York (CCNY)

B.S. Computer Science | **GPA: 3.8/4.0**

June 2026

New York, NY

- **Honors:** Dean's List (2021–Present), Grove School of Engineering Scholarship
- **Activities:** ACM (Workshop Speaker), Girls Who Code (Mentor)

TECHNICAL SKILLS

Languages & Frameworks: Python, C++, JavaScript, C#, PHP, Node.js, Django, React.js

Databases & Tools: MongoDB, MySQL, AWS S3, Docker, Git

Software Engineering: REST APIs, OOP, System Design, Cloud Computing, Agile Methodologies, Test-Driven Development (TDD), CI/CD

Machine Learning: CNNs, VDSR, SciKit Learn, Tensorflow, Data Pipelines

EXPERIENCE

Research Assistant – BioMind AI Lab

May 2025 – Sep 2025

City College of New York (with WVU Medicine)

New York, NY

- Reduced MRI annotation time by **60%** by building modular python preprocessing pipelines, improving scalability of data workflows
- Developed an AI pipeline combining CNNs and LLMs, improving efficiency of cardiovascular MRI processing

Deep Learning Research Intern

Jun 2024 – Dec 2024

Memorial Sloan Kettering Cancer Center

New York, NY

- Improved MRI image quality (**SSIM 0.85**) by implementing and optimizing a VDSR deep learning model
- Supported model experimentation and evaluation, improving reliability of MRI image enhancement workflows

Software Engineering Intern

Feb 2024 – Apr 2024

Unadat

New York, NY

- Improved backend reliability by **40%** by leading development of RESTful APIs within an Agile sprint cycle, ensuring timely delivery of fault-tolerant workflows
- Enhanced user experience by redesigning UI components, resulting in a **25%** increase in user engagement
- Built full-stack features using PHP, MySQL, and JavaScript to support reliable milestone tracking workflows

Data Science Fellow

Aug 2023 – Dec 2023

Operartis

Remote

- Improved transaction matching accuracy by **25%** by building a Python-based financial matching engine
- Developed reusable modules for data ingestion and error handling, improving performance and maintainability

Research Project Intern

Jun 2023 – Aug 2023

Advanced Science Research Center

New York, NY

- Reduced data processing time by **30%** by automating spectroscopy workflows using MATLAB
- Integrated MATLAB with lab APIs to enable reliable real-time data acquisition

PROJECTS

MentalMed Interaction Checker

Mar 2026 – Present

React, Django, MongoDB

- Building a **Full-stack application** to detect drug interactions using RxNorm/DrugBank APIs
- Designing backend APIs to enable real-time medication safety analysis and system data flow

TrustSphere E-Bidding System

Oct 2024 – Dec 2024

Node.js, MongoDB, React

- Built **30+ RESTful APIs** to support real-time bidding workflows, ensuring scalable and reliable backend operations
- Designed scalable MongoDB schemas and optimized queries to improve performance and data retrieval efficiency
- Implemented testing using Jest, improving code quality and maintainability

LEADERSHIP

Workshop Speaker – Data Science

Mar 2024

ACM, CCNY

New York, NY

- Managed technical workshops on data science concepts to student audiences
